

JAVASCRIPT - 2 SAU 2021 Batch 2

(S SUSHRUTHA)

1.Create an HTML Form with different kind of controls.

Submit button should validate all the controls.

Input fields should be required.

Create an object of student with firstname, lastname, age , gender, rollno and dob. Add a field occupation to the object with an input value from user.

Create a Get Button which when clicked with an input of roll no. shows the student details.

REGISTRATION FORM

FIRSTNAME :

LASTNAME :

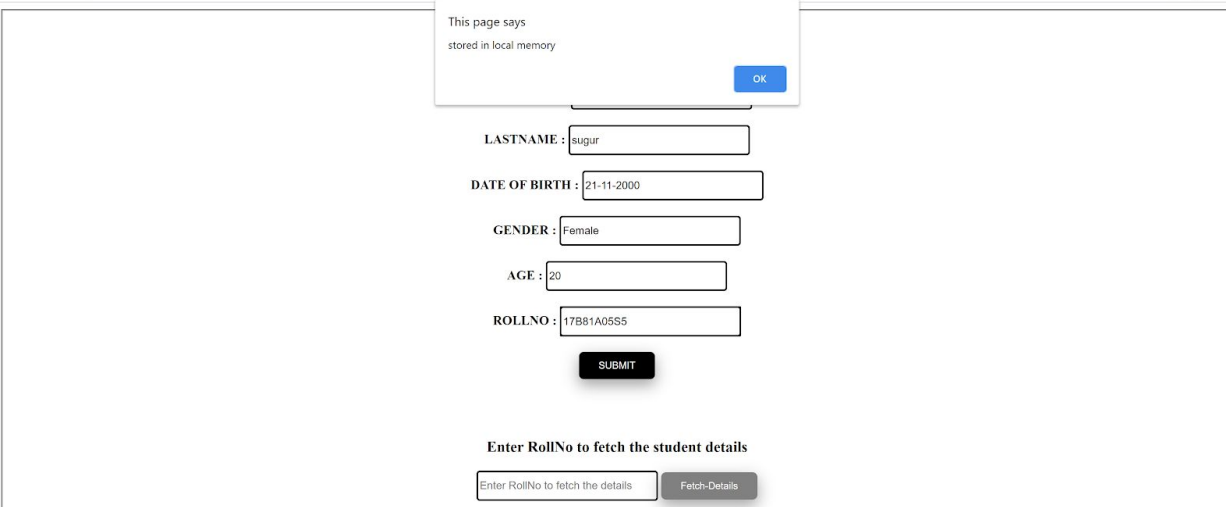

DATE OF BIRTH :

GENDER :

AGE :

ROLLNO :

Enter RollNo to fetch the student details

This page says
stored in local memory

LASTNAME :

DATE OF BIRTH :

GENDER :

AGE :

ROLLNO :

Enter RollNo to fetch the student details

JAVASCRIPT - 2 SAU 2021 Batch 2

(S SUSHRUTHA)

The screenshot shows a web browser with the URL `studentregform.html`. The page displays a registration form with the following fields:

- FIRSTNAME :
- LASTNAME :
- DATE OF BIRTH :
- GENDER :
- AGE :
- ROLLNO :

Below the fields is a **SUBMIT** button. Underneath the form, there is a section titled "Enter RollNo to fetch the student details" with an input field containing "555" and a **Fetch-Details** button.

The browser's developer tools are open, showing the **Application** tab. The **Storage** section is expanded, showing **Local Storage** with a single entry:

Key	Value
555	{"firstname":"sushrutha","lastname":"sugur","dob":"27-11-2000","gender":"female","age":"20","rollno":"555"}

The **Console** tab is also open, showing the message "Select a value to preview".

Create a Get Button which when clicked with an input of roll no. shows the student details.

The screenshot shows the same web browser with the registration form. The **Fetch-Details** button has been clicked, and the student details are now displayed in the console. The **Storage** section in the developer tools still shows the same entry:

Key	Value
555	{"firstname":"sushrutha","lastname":"sugur","dob":"27-11-2000","gender":"female","age":"20","rollno":"555"}

The **Console** tab now displays the following JSON object:

```
{"firstname":"sushrutha","lastname":"sugur","dob":"27-11-2000","gender":"female","age":"20","rollno":"555"}
```
